SOLAR PREHEAT

GAS or ELECTRIC COMBINATION SYSTEMS

Wilson Hot Water, established since 1930, have a range of Solar preheat Gas & Electric boosted hot water systems; to suit your requirements or specification.

Our pressure vessels are manufactured exclusively in stainless steel for industrial, commercial & residential applications.

We can custom build to suit your specific requirements.

Solar Preheat Tank Mounted **Boiler**

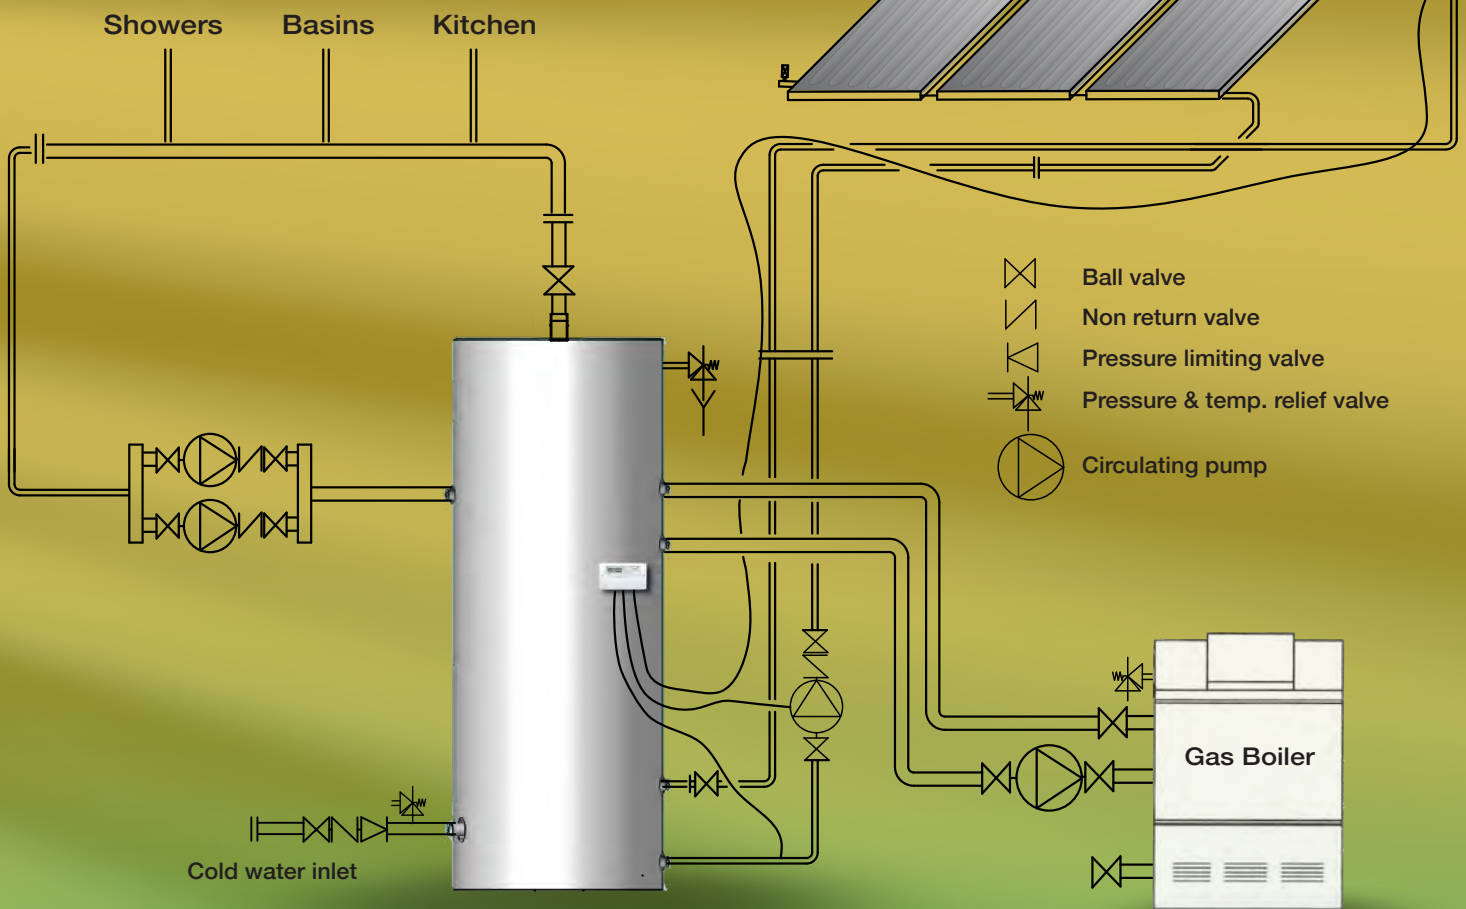

Our design maximises solar contribution to reduce operating costs, while still ensuring recovery rates required during peak demand.

The Wilson Solar Preheat range is designed from the ground up for specific functions that include stand alone storage tanks, combination units for Solar/Gas or Electric boosted systems.

Standard ranges are available to suit large apartments blocks, supermarkets, nursing homes, hotels, hospitals, aged care, abattoirs, mining & processing plants amongst many other applications.

Solar Preheat Free Standing **Boiler**

Skid mounted packages available
